

Amendment to the Specification

Please replace the paragraph beginning on page 2, line 12 with the following amended paragraph:

The link may be selected through manipulation of a pointing device, such as by clicking on the link using a middle button on a mouse. A warning message may be displayed in response to the user selection of the link. The warning message may require a response before performing a redirection to the URL. The software application may automatically determine whether the URL is suspicious and may display the warning message only if the URL is determined to be suspicious. [[.]]
